

IPAX Green 4 Kleen

Applications

Green 4 Kleen is a versatile industrial strength cleaner and degreaser that leaves no residue. It was developed by IPAX for heavy-duty industrial use and to replace hazardous cleaning systems which threaten the environment and health of users and bystanders. This all-in-one product safely cleans all washable surfaces of grease, oil, dirt, graphite and carbon residue. This industry leader in degreasing penetrates and cleans parts by safe chemical action, and leaves a residue-free surface suitable for plating, welding or painting. It can be used in floor scrubbing machines, carpet cleaning machines, pump-up sprayers, brush application, parts washers and pressure washers. Green 4 Kleen is concentrated to allow for higher dilution than competing products, which saves time and money.

Characteristics

Green 4 Kleen is a non-regulated cleaner that meets and exceeds all regulatory guidelines of the EPA, USDA and MIOSHA. It also has environmental certification from Green Seal in the U.S. and Environmental Choice in Canada.
